Mr. James W. Smith, Jr.
Coordinator of Mined Land Development
State of Utah
Department of Natural Resources
Division of Oil, Gas, and Mining
1588 West North Temple
Salt Lake City, Utah 84116

Dear Mr. Smith:

In answer to your inquiry of June 17, 1981 to Dr. Schultz regarding the seasonal nature of the oolitic sand operation. Oolitic sand is not mined during the winter months because of freezing of the wash water and expected difficulties in moving about the pit during wet weather. About 50,000 tons of oolitic sand is mined, washed, then stockpiled in the plant during the summer months, generally about May through September. The pits are graded down and left dormant about October through April.

Yours very truly,

E. E. Millaway
Pond Production Services Engineer
